

Sai Teja Gajula

Full Stack Developer

saitejagajula693@gmail.com | (913) 624-3253 | USA | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

Summary

Full Stack Developer with 4+ years of experience building scalable web applications and cloud-based solutions. Proficient in Python, Node.js, React, and modern frontend/backend frameworks. Skilled in REST/GraphQL APIs, microservices, AI/ML integration, databases, containerization, CI/CD, and cloud platforms (AWS, Azure, GCP). Adept at delivering secure, high-performance, and maintainable software solutions.

Technical Skills

- Programming & Frameworks:** JavaScript (ES6+), TypeScript, Python (Flask, Django, FastAPI), Node.js, Express.js, React.js, Next.js, HTML5, CSS3, Bash, SQL (T-SQL, PL/pgSQL), Java, Spring Boot, JPA/Hibernate, C#, .NET Core, ASP.NET Core, Maven
- Frontend Development:** React.js, Redux, React Router, Next.js, Bootstrap, Tailwind CSS, Material UI
- Backend & API Development:** REST APIs, GraphQL, WebSockets, CQRS, Microservices (Netflix OSS), JWT Auth, OAuth2, OpenID Connect, Secure API Gateways, Event-Driven Architecture (Kafka, Azure Event Hub), API Versioning, Automated Unit & Integration Testing
- AI & Machine Learning:** scikit-learn, TensorFlow, PyTorch, Keras, NLP & text analytics (AWS Comprehend, AWS Titan, OpenAI GPT, BERT, Hugging Face Transformers, spaCy, NLTK), Data preprocessing, Feature engineering, Model deployment, Predictive analytics, Recommendation systems
- Databases & Data Engineering:** PostgreSQL, MySQL, MongoDB, MS SQL Server, Firebase, Cassandra, Redis, Snowflake, BigQuery, Apache Spark, Databricks, Delta Lake, Apache Kafka, AWS Kinesis, Airflow
- Cloud & DevOps:** AWS (EC2, S3, Lambda, Kinesis, DynamoDB, EKS, CodePipeline, CodeBuild, CloudWatch, Comprehend), Azure (AKS, Azure Storage, Azure SQL, Event Hub), Google Cloud (GCS, Firebase Hosting), Docker, Docker Compose, Kubernetes, Helm, Terraform, Jenkins, GitHub Actions, GitLab CI/CD, MSBuild, NuGet, SonarQube, Spinnaker
- Testing, Monitoring & Security:** xUnit, NUnit, Moq, Jest, Mocha, Cypress, Postman, Swagger, Prometheus, Grafana, CloudWatch, RBAC, OAuth2, OpenID Connect, API Encryption, GDPR, HIPAA, ISO 27001, SOC 2, PCI DSS, SSL/TLS, CORS, API Rate Limiting

Professional Experience

Full Stack Developer, Intuit, Inc.

01/2025 – Present | Remote, USA

- Designed and developed AI-driven small business financial management platform using React frontend, Python (FastAPI) backend, PostgreSQL, AWS, and Kafka, leveraging Generative AI and transformer LLMs for cash flow forecasting, invoice optimization, and product recommendations, increasing engagement 15%.
- Built scalable Python microservices supporting billing, payroll, invoicing, and accounting dashboards, integrating with PostgreSQL and AWS services, reducing service errors by 10%, improving system reliability, for high performance for concurrent real-time financial transactions and analytics.
- Integrated Generative AI and transformer LLMs for transaction classification, expense prediction, personalized insights, and revenue forecasting, optimizing user decision-making and retention, while enabling predictive financial recommendations and smarter business financial management, boosting retention by 17%.
- Implemented secure authentication and authorization using OAuth2, OpenID Connect, AWS IAM, and custom token services, strengthening identity management, reducing login failures by 8%, maintaining compliance with Intuit privacy and security standards, and enabling secure platform access.
- Containerized React frontend and Python backend using Docker and AWS ECS, enabling auto-scaling, high availability, observability via CloudWatch and Splunk dashboards, improving platform reliability by 12%, supporting multi-region deployment, and ensuring operational efficiency and uptime.
- Developed automated CI/CD pipelines in collaboration with DevOps using Spinnaker, AWS CodePipeline, Maven, Jenkins, SonarQube, JUnit, and Jest, handling deployments, zero-downtime weekly releases, improving code quality, team collaboration, and system scalability efficiently.

Full Stack Developer, Zoho Corporation Pvt. Ltd.

06/2020 – 08/2023 | Hyderabad, India

- Designed and developed Zoho Creator Purchase Order Management application using React and Node.js, collaborating with product managers, QA, UX teams, and stakeholders, participating in requirement gathering, design discussions, and sprint planning for scalable SaaS solutions.
- Engineered four REST APIs—Purchase Order API, Vendor Management API, Approval Workflow API, and Reporting API—using Node.js and Express, improving response reliability and maintainability, reducing latency by 12%, increasing API throughput by 8%, and supporting multi-tenant usage.
- Built reusable React components and role-based dashboards to visualize orders, approvals, and analytics, improving usability and operational visibility, enhancing task completion efficiency by 15%, reducing manual effort by 10%, and accelerating approval turnaround by 12%.
- Implemented secure authentication and authorization using OAuth 2.0, JWT, and RBAC, ensuring GDPR compliance, protecting sensitive vendor and financial data, and reducing access-related security incidents by 10%, while improving overall login success rate by 5%.
- Optimized MySQL and PostgreSQL databases through indexing, schema refactoring, and query tuning, supporting reporting modules while improving query performance by 14%, reducing average report generation time by 9%, and enhancing system stability by 8%.
- Developed comprehensive unit and integration testing using Jest and Mocha for Node.js services, validating business logic, improving code reliability, and reducing regression defects and post-release issues by 13%, with test coverage improving by 15%.
- Collaborated with DevOps teams to containerize Node.js services using Docker, implement CI/CD pipelines, automate deployments, support monitoring, and maintain high availability, reducing deployment errors by 11% and improving release efficiency by 12% for Zoho Creator applications.

Education

Master of Science in Computer Science
University of Central Missouri, Warrensburg, MO, USA

08/2023 – 05/2025

Bachelor of Science in Computer Science
Jawaharlal Nehru Technological University Kakinada (JNTUK), Andhra Pradesh, India

2017 – 2021

Projects

Smart Inventory Management System

- Developed a inventory platform using React, Node.js, and PostgreSQL with real-time analytics, automated stock alerts, role-based dashboards, REST APIs, and containerized deployment on AWS, enabling efficient resource tracking, predictive restocking, and operational optimization.

AI-Powered Sentiment Analysis Dashboard

- Built a web dashboard using Python (Flask), React, and MongoDB, integrating NLP models (spaCy, Hugging Face Transformers) to analyze social media sentiment in real time, visualize insights, and generate predictive reports for decision-making and trend monitoring.
